

Baby Swim Program, Duck 1 - Duck 5 (5 months - 3 years)

Baby Swim provides the opportunity for both parent and baby to experience pure aquatic enjoyment while learning essential water safety skills to become strong, safe and confident in the water. The lessons are focused around having fun, while incorporating skill based activities into numerous games and songs.

Maximum 8-10 children per class.

The preschool program further develops the skills learnt in Baby Swim. However, this does not prevent inexperienced children from entering the program.

Pre-School Program, Transition, Levels 1 - 4 (3 - 6 years)

Swimmers aged 3 and above have their lessons without a parent in the water. Children are placed in ability-appropriate lessons to ensure a suitable learning level environment.

Children at this level are educated by:

- Reinforcing basic water skills such as back floats, front floats, gliding front and back, kicking front and back, eyes in exhaling and blowing bubbles.
- Developing independent movement on both front and back.
- Encouraging safe water practices, teaching basic water safety.
- Commencing the development of correct stroke technique.
- Basic Rescue Techniques.

Maximum 4 children per class.
